

REMARKS

The foregoing amendments are being presented to correct typographical errors in the Application. The amendment to the specification is to correct a typographical error regarding the final product of Example 97. The title of Example 97 indicates that the stereochemistry of the product is "2-(R)" and the stereochemistry of the starting material is "2-(R)". Accordingly, the typographical error in the name of final product on page 223, lines 30-33 has been corrected. Similarly, the stereochemistry of the title compound of Example 110 and the product listed on page 242, lines 4-7 is designated as "[2R-". The typographical error in the alternate name for the final product on page 242, lines 8-10 has been corrected. Thus, these typographical corrections are fully supported by the application as filed and do not introduce new matter.

In addition, the claims have been amended to correct a typographical error with respect to claim dependencies.

The Applicants gratefully appreciate the Examiner's attention in correcting the typographical errors in the specification and the claims.

Respectfully submitted,

By 
Eric Thies
